DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities:

On page 7, line 19, "Figs. 2 and 3" appears to be inaccurate, and it seems that it should be changed to --Fig. 2--.

On page 8, line 3, "blind" is unclear as to what is being described, and it seems that it should be changed to --fence-- or to include that or a similar term for clarity.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2, the recitation "adapted to support a workpiece" is vague and indefinite as to how the base is "adapted" to perform the recited function, and it is suggested to change "adapted to" to --for-- or the like; in lines 8-9, the recitation "adapted to project an image line on the workpiece" is vague and indefinite as to how

the light-emitting unit is "adapted" to perform the recited function (i.e., it is not clear as to what structure is assigned to the light-emitting unit by the use of the "adapted to" phrase).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nidbella, pn 4,257,297.

Nidbella discloses a cutting apparatus (e.g., in Figure 1) with every structural limitation of the claimed invention.

Claim Rejections - 35 USC § 102/103

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claim 1 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Chen, pn 6,688,203.

Chen discloses a cutting apparatus (e.g., in Figure 1) with every structural limitation of the claimed invention.

In the alternative, if it is argued that Chen does not explicitly disclose that the light-emitting unit is movable in a transverse direction such that the image line can be formed on opposite sides of the saw blade, it would have been obvious to one having ordinary skill in the art to provide such a configuration to better meet the goals of the Chen patent by providing for adjustments in both directions and on opposite sides of the

saw blade to compensate in either direction for the vibration produced during the cutting process.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
